

MAYA RAO

Platform SRE and Cloud Infrastructure Lead

Sydney, Australia | maya.rao@example.com | +61 400 555 018

PROFILE

Platform reliability specialist with more than 9 years of experience operating high-availability cloud services. Focused on Kubernetes, AWS, Terraform, Go, Prometheus, Grafana, incident response, and developer platform engineering.

CAPABILITY SNAPSHOT

- Cloud and infrastructure: AWS, Kubernetes, Docker, Terraform, Helm, Linux
- Reliability: SLOs, error budgets, incident command, capacity planning, chaos testing
- Observability: Prometheus, Grafana, OpenTelemetry, Loki, distributed tracing
- Engineering: Go, Python, REST APIs, gRPC, GitHub Actions, Argo CD

IMPACT PORTFOLIO

Developer Platform Modernization

Principal SRE | CloudHarbor | 01/2023 - Present

- Led a Kubernetes platform supporting 180 services across three AWS regions.
- Created Go-based deployment and policy tooling that reduced release lead time by 45 percent.
- Introduced service-level objectives and error budgets for critical customer journeys.

Observability and Incident Reduction

Senior Site Reliability Engineer | OrbitPay | 08/2019 - 12/2022

- Standardized metrics, logs, and traces with Prometheus, Grafana, and OpenTelemetry.
- Automated recovery playbooks and reduced high-severity incidents by 35 percent.
- Managed Terraform modules for network, compute, database, and identity services.

Cloud Operations Foundation

Cloud Engineer | Southern Cross Systems | 07/2016 - 07/2019

- Migrated Linux applications to AWS and established infrastructure-as-code practices.
- Built CI/CD pipelines and containerized services with Docker.
- Participated in on-call rotations and post-incident reviews.

OPERATING PRINCIPLES

Automate repetitive operations. Measure reliability from the customer perspective. Prefer simple platforms with clear ownership, safe defaults, and actionable telemetry.

EDUCATION

Bachelor of Engineering in Computer Science, University of Technology Sydney, 2012 - 2016
